Savings Comparison: Start Here

1. On 'My Inputs', fill in the yellow cells: how much you can save each month, your down payment goal, and how many years to project.
2. On 'Bank Products', the rates and fees are illustrative values made for this project. Check each bank's website for current figures before relying on them.
3. Look at 'Dashboard' for the balance each option reaches, what it cost you in fees, and how long it takes to reach your goal.

Colour key: yellow cells with blue text are things you type. Everything else is a formula, so don't type over it.
Assumptions: contributions are added once a year and returns compound yearly. This is a simple approximation, not bank advice.
All rates and fees in this workbook are illustrative. They were made up for this project to show how the model works. They are not real bank offers.

Stuck on a term? See the Glossary tab for plain-English definitions of GICs, MERs, TFSAs and more.
Please read the Disclaimers tab before relying on any result.

Dashboard: Where should my savings go?

Everything here updates from My Inputs and Bank Products. Rates and fees are illustrative values for this project, not real bank offers.

Best option for my timeframe: **CIBC Index fund / ETF**
Balance it reaches: **$87,310**
Years to reach my down paymer **6**

All schemes compared

Bank	Product	Balance after my timeframe	Total I put in	Growth from returns (after fees)	Years to reach down payment	Rank (1 = best)
RBC	High-interest savings	$69,847	$62,000	$7,847	7	12
RBC	1-year GIC	$75,240	$62,000	$13,240	7	9
RBC	Index fund / ETF	$86,155	$62,000	$24,155	6	3
TD	High-interest savings	$69,450	$62,000	$7,450	7	14
TD	1-year GIC	$75,673	$62,000	$13,673	7	7
TD	Index fund / ETF	$85,410	$62,000	$23,410	6	4
BMO	High-interest savings	$69,649	$62,000	$7,649	7	13
BMO	1-year GIC	$75,456	$62,000	$13,456	7	8
BMO	Index fund / ETF	$86,907	$62,000	$24,907	6	2
Scotiabank	High-interest savings	$69,253	$62,000	$7,253	7	15
